ERIC CAVALCANTI

GRAPHIC DESIGNER / WEB DEVELOPER

ABOUT ME

Hello! I'm **Eric Cavalcanti**, a Junior Full Stack Developer passionate about the intersection of technology and design. With a background in Graphic Design and a postgraduate degree in UX/UI Design, I aim to integrate creativity and functionality into all my projects.

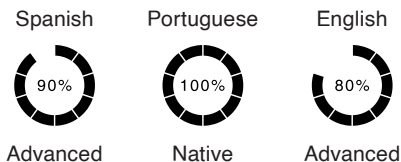

With almost 10 years of experience in Graphic Design and UX/UI, I was able to help companies with advertising campaigns and position their brand in the market. I now enter the field of web development with the aim of developing web applications that not only visually impress but also offer an intuitive and integrated user experience.

I'm excited to contribute to dynamic teams, collaborate on innovative projects, and continue learning and growing in the web development field. I'm open to new development opportunities and eager to be part of teams that value creativity, innovation, and teamwork. If you're looking for a Full Stack Developer passionate about design and technology, I'd be happy to connect and explore potential collaborations.
